PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years shipping production web apps in React.js and Next.js at a Thai tech startup. Specialized in fintech platforms (KYC, trading, wallet systems) and AI-integrated products using Claude/OpenAI APIs and n8n automation. Promoted from Junior to mid-level, comfortable working in cross-functional agile teams and fast-paced startup environments.

WORK EXPERIENCE

Frontend Engineer — DEV DOGDOG CO., LTD. · Promoted from Junior · Mar 2021 – Present

Tech startup · Cross-functional agile team · Production systems across Fintech, AI SaaS & E-Commerce

- Build and maintain production Next.js / React apps across multiple product domains — fintech, AI SaaS, and e-commerce — serving real users on desktop and mobile.
- Own frontend feature delivery end-to-end: API integration, state management (Redux, Zustand, React Query), form validation, and reusable UI components (Tailwind CSS, Ant Design, MUI).
- Integrate Claude/OpenAI LLM APIs and build n8n automation pipelines; use Claude Code and GitHub Copilot to accelerate sprint delivery.
- Coordinate with designers and stakeholders via JIRA/Confluence; debug across frontend and backend layers.

SELECTED PROJECT HIGHLIGHTS

Crypto / Financial Exchange Web Platform

- Built 10+ Next.js modules: homepage, market overview, trading/convert, dashboard, wallet/asset, deposit, withdrawal, fiat/OTC — all integrated with live APIs.
- Implemented auth-aware routing, access/refresh-token handling, KYC flows, 2FA/OTP, withdrawal pre-checks, and transaction history.
- Delivered full Thai/English i18n using Next.js App Router and i18n routing patterns.

AI-Powered Web Console (SaaS Product)

- Built chatbot config UI, knowledge management, billing screens, and team dashboards with React Query, Auth0, and SSE/WebSocket real-time updates.
- Contributed to shared component library in a pnpm + Turborepo monorepo with strict TypeScript and ESLint module boundaries.

Bilingual E-Commerce & Automation

- Shipped product catalog, cart, checkout, flash sales, reseller/commission logic, CMS content, and unit-tested components for a bilingual storefront.
- Self-hosted n8n on Docker; built LLM-to-web-service automation pipelines for AI-generated workflow outputs.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
State / Data	React Query, Redux, RTK Query, Zustand, Context API, Axios, RESTful APIs
UI	Tailwind CSS, Ant Design, Material UI, Radix UI, Bootstrap, Styled-components
AI / LLM	Claude API, OpenAI API, Prompt Design, n8n Automation, AI-assisted Dev
Backend/CMS	Node.js, Golang, PHP/WordPress, Directus
Tools	Git, Docker, pnpm, Turborepo, Vitest, Postman, JIRA, Confluence

EDUCATION & LANGUAGES

B.Sc. Information Technology — Surindra Rajabhat University
· 2016–2020

Thai — Native · English — Working Proficiency
